

Titles & Tags Swipe File

Ready-to-paste Etsy listing titles and tag sets for all 30 vault designs — so every listing you publish starts life searchable.

How to List Your Vault Designs

You have six PDF packs, one per niche, with five designs in each — 30 listings ready to go. Work through them pack by pack rather than mixing niches in one shop: a focused shop converts better and Etsy's search rewards relevance.

1. Split each pack into single-design files if you plan to sell designs individually (any free PDF splitter works), or sell each 5-design pack whole as a bundle listing at a higher price. Bundles of a full pack, priced at roughly three times a single design, are the best-margin option for most shops.
2. Create the listing as a digital download and upload the PDF file. Add at least five listing images: the design page itself, a lifestyle mockup (the page on a desk, in a binder, or on a fridge), a close-up of the detail, a "what's included" image, and a size/format image (US Letter, print at 100%).
3. Paste the title from this swipe file exactly as written, then paste the 13 tags one per tag box. Fill in every attribute Etsy offers for the category, and write a description that says what the page does, what size it is, that it is a digital download (no physical item ships), and how the buyer prints it.
4. Price singles in line with your niche (most printable planner pages sell in the \$2.50–\$6 range) and set the pack bundle so buying the set is the obvious deal. Publish, then move to the next design — momentum beats perfection here.

Your Commercial License — Plain English

Your purchase of the Done-For-You Printable Vault includes a commercial license for the 30 designs, on these terms:

YOU MAY sell the finished designs as digital-download products in your own shop (Etsy or a similar marketplace), as many copies as you like, and keep all of the revenue. You may sell them individually or bundled, and you may add your own shop branding to your listing images and shop pages.

YOU MAY NOT resell, give away, share, or redistribute the vault itself or its source files (including this swipe file) — your buyers get the finished printable PDFs, not the vault. You may not claim the designs are your own original creations for the purpose of reselling them as templates, PLR, or a done-for-you pack of your own, and you may not use the Printable Profits name or branding in your listings.

In short: sell the printables to end customers all day long. Don't sell the selling-rights, and don't pass the designs off as a template pack you created.

Before You List: Fees & Policies

Etsy charges a listing fee per item, a transaction fee on the sale price (including shipping charges, if any), and a payment-processing fee; optional programs such as Offsite Ads can add fees on attributed sales. Amounts and policy details change over time — before you price and publish, verify the current figures in Etsy's official Fees Policy and confirm digital-download rules in the Seller Policy so your listings stay compliant.

Every title in this file is 140 characters or fewer and every tag is 55 characters or fewer, within Etsy's current

limits at the time of writing — re-check the limits if Etsy updates them.

Home Organization
